Justin

History

The Committee was announced October 1st, 2018 by Maxime Coutte when he left the role of Relativity's principle maintainer. He established the Committee with 4 most active and important contributors to the project: TheYхху, Lost Garden (Haruun), Hugo Garritsen, and Кзобтовский (Хобtah).

On April 17th, 2019 Justin has been added to the committee. He helps a lot with the Linux side of the project.

Functions

"contributors <...> are able to make decisions and lead the community forward according to my philosophy. This small group will work to achieve consensus, act as leaders, and when needed, will come back and talk to me." -Maxime Coutté.

The Committee members are leading the project according to the goals described by Maxime. [1] (<http://web.archive.org/web/20200909123005/https://medium.com/maxime-coutt%C3%A9/the-next-steps-for-relativty-the-open-source-vr-headset-33232a41704c>)
